SUMMARY

- We have quite large and qualified Physics and MC team. It is able to perform the task of CDR preparation.
- **Physics part** that defines our setup **is almost ready**.
- **For significant part of our physics** MC simulation chain **is almost ready**. But the SPD setup configuration should be fixed for final results. **D-mesons** is our **main problem** at the moment.
- I do not see the reason that could prevent us to prepare the physic & MC part of the CDR till the end of November.
